Job description of Data Engineer

Job Title: Data Engineer

Location: Hyderabad

Job Type: [Full-time]

About Us

At SmithMaven Technologies Private Limited ("Bridgehorn"), we leverage data to drive decisions and enhance our products and services. We are seeking a motivated **Data Engineer** to join our dynamic team. This role is ideal for individuals who are eager to learn and grow in the field of data engineering.

Job Summary

As a Data Engineer, you will assist in the development, maintenance, and optimization of our client's data infrastructure. You will work closely with data analysts and data scientists to ensure that our data systems are efficient, reliable, and scalable.

Responsibilities

- **Database/Data Warehouse Development:** Strong understanding of SQL and designing efficient queries, conceptual understanding of tabular data model and its development etc.
- **Data Pipeline Development:** Assist in building and maintaining data pipelines for ETL (Extract, Transform, Load) processes using various tools and techniques in **Azure (Data Factory, Databricks (incl. Data Lakehouse), DevOps, and Storage Accounts) & Snowflake** environments.
- **Data Lake Development:** Assist in developing the **medallion framework** for persisting, transforming and creating data models. Depending on the data extraction frequency, design appropriate approaches for data ingestion i.e., full versus incremental data loads
- **Data Visualization:** Build powerful dashboard and reports in Power BI or Tableau or any other BI tool
- **Documentation:** Document data processes and workflows for knowledge sharing.
- **Collaboration:** Work with data analysts and software engineers to understand data requirements and deliver relevant datasets.

Required Skills and Qualifications

- **Experience:** Minimum 3 years of experience is mandatory in data management projects with technologies like Microsoft Fabric, Snowflake, Databricks with related tools and technologies
- **Programming Skills:** **Excellent skills in SQL & Python** are essential for this role
- **Data Management:** Basic understanding of database management systems, data warehouse and data modelling is essential for this role
- **Analytical Skills:** Strong analytical abilities to interpret trends and patterns in complex datasets.

- **Communication Skills:** Excellent verbal and written communication skills for collaborating with team members.

Benefits

- Competitive salary and performance bonuses.
- Opportunities for professional development and certifications.
- Collaborative work environment with a focus on innovation.
- Direct access to decision makers in the industry

How to Apply

If you are passionate about data engineering and eager to develop your skills in a supportive environment, please submit your resume and cover letter to **careers@bridgehorn.com**. We look forward to hearing from you! This job description outlines the essential elements needed for a Data Engineer role, emphasizing both technical skills and opportunities for growth within the company.
