

EDUCATION

National Institute of Technology, Silchar	Assam, India
<i>B.Tech in Electronics and Communication Engineering; CGPA: 7.32</i>	2023 – 2027 (Expected)
Resonance Junior College	Hyderabad, India
<i>Intermediate; Percentage: 98.5</i>	2021 – 2023
Raman High School	Warangal, India
<i>SSC; CGPA: 10</i>	2016 – 2021

INTERNSHIP EXPERIENCE

S.N. Bose Summer Internship Program	NIT Silchar, Assam
<i>Financial Fraud Detection using Graph Neural Networks</i>	June 2026 – Present
- Built an end-to-end AML detection pipeline in Python on the IBM Transactions for Anti-Money Laundering dataset, covering 5M+ transactions and 515K+ account nodes. - Engineered graph datasets with 20+ node and 50+ edge features capturing transactional, temporal, and behavioral patterns, including inter-transaction gaps, burst activity, and amount statistics. - Designed GraphSAGE+MLP and GINE edge-classification models in PyTorch Geometric, using neighborhood sampling, temporal data splits, and class-imbalance handling for scalable fraud detection. - Benchmarked architectures on highly imbalanced financial data, achieving PR-AUC 0.359, Precision 39.2%, Recall 34.3%, and F1 0.366 on the held-out HLSMALL split. - Tools Used: Python, PyTorch, PyTorch Geometric (PyG), NumPy, Pandas, Scikit-learn.	

PROJECTS

CollegeNet – MERN Stack Community Platform — Live Demo — GitHub	Jan 2026 – Present
<i>Personal Project</i>	<i>Full Stack Developer</i>
- Built a full-stack MERN platform for college communities to report lost & found items, buy/sell/trade products, post wanted requests, and message in real time. - Implemented JWT-based authentication with email verification, password reset, and protected routes. - Built Lost & Found, Marketplace, and Wanted Post modules with image uploads, claim verification workflows, and listing management. - Integrated Socket.io for real-time messaging, instant notifications, persistent conversation history, and live activity updates. - Designed RESTful APIs with Express.js and MongoDB for user management, listings, messaging, and notifications. - Used ImageKit for cloud image storage, optimization, and fast content delivery. - Built a responsive React and Tailwind CSS frontend for a consistent experience across desktop and mobile. Tech: React.js, Vite, Node.js, Express.js, MongoDB, Socket.io, JWT, ImageKit, Tailwind CSS.	
HireMate AI – AI-Powered Placement & Career Preparation Assistant — GitHub	Jul 2026 – Present
<i>Personal Project</i>	<i>Full Stack Developer</i>
- Built a MERN platform that helps students manage placement applications, track deadlines, and prepare for interviews end-to-end. - Integrated Google’s Gemini LLM API with custom prompt engineering to parse resumes and job descriptions, compute ATS match scores, detect skill gaps, and generate personalized preparation roadmaps. - Built an AI study module using Retrieval-Augmented Generation (RAG) with an LLM-based tutor, enabling users to upload study material and query context-aware, prompt-engineered responses for concept explanations. - Designed a preparation module with daily aptitude/technical quizzes, automated scoring, streak tracking, and performance analytics to drive consistent practice. - Implemented JWT authentication, PDF upload/parsing pipelines, and RESTful APIs with MongoDB for users, applications, study resources, and AI-generated insights. - Developed a responsive React frontend with reusable components, Axios interceptors, and dashboards for application tracking, study progress, and AI recommendations. Tech: React.js, Vite, Node.js, Express.js, MongoDB, JWT, Gemini API, LLMs, Prompt Engineering, RAG, Multer, Axios.	

TECHNICAL SKILLS

- Languages:** Python, C, C++, JavaScript, TypeScript, SQL, HTML, CSS
- Web Development:** React.js, Node.js, Express.js, Tailwind CSS, REST APIs, JWT Authentication, Socket.io, Vite
- Data Science & ML:** NumPy, Pandas, Matplotlib, PyTorch, PyTorch Geometric (PyG), Graph Neural Networks (GNNs), GraphSAGE, Exploratory Data Analysis (EDA)
- AI & LLMs:** Large Language Models (LLMs), Prompt Engineering, RAG Pipelines, LLM APIs, LangChain
- Databases & Analytics:** MySQL, MongoDB, Database Design, Normalization, Indexing, Views, Stored Procedures, Triggers, Power BI, Excel, ETL, Dashboard Development
- Tools & Platforms:** Git, GitHub, Postman, ImageKit, Linux, Windows
- Soft Skills:** Leadership, Teamwork, Problem Solving, Public Speaking, Time Management

ROLES & RESPONSIBILITIES

Think India, NIT Silchar	Silchar, Assam
<i>Content & Documentation Team Member</i>	<i>August 2023 – Present</i>
- Prepared content, reports, and official documentation for technical and cultural events. - Coordinated with team members to create promotional materials and maintain event records.	

OTHER INTERESTS & ACTIVITIES

- Enjoy solving Data Structures and Algorithms (DSA) problems on LeetCode to strengthen my problem-solving skills.
